

2-23-2015

Naturopathic Medicine Formulary subcommittee meeting

In our recommendations presented to the naturopathic medicine committee on 1-27-2014 we continue to support that Physician and Supervision supervision should be eliminated. The formulary should be exclusionary and include “All legend drugs and all scheduled drugs with the exclusion of schedule 1 and 2 drugs”. This is consistent with the current formulary under Physician and Supervision supervision.
