2-23-2015

Naturopathic Medicine Formulary subcommittee meeting

In our recommendations presented to the naturopathic medicine committee on 1-27-2014 we continue to support that <u>Physician and Supervision</u> supervision should be eliminated. The formulary should be exclusionary and include "All legend drugs and all scheduled drugs with the exclusion of schedule 1 and 2 drugs". This is consistent with the current formulary under <u>Physician and Supervision</u> supervision.
